

## Divine Order Jeffon Seely

In this infinite universe we are all a part of there is an underlying Essence, Energy and Presence filling all things. It is within the gases, minerals and elements that combine to form planets and stars. It is not only within all these things, but it is the space in which all things are created.

Divine Order is the Essence that pulls planets together to create solar systems and galaxies. It is that which empowers our sun to shine upon our sacred planet. It is that which empowers our planet to spin, rivers to flow, animals to be birthed and plants to grow.

It is within each and everyone of us. It is the Presence that enabled us to wake up this morning, It is that which beats our hearts, breathes oxygen through our lungs, empowers our cells to divide, and the underlying Essence that enables our atoms to thrive.

This Divine Order is ever-present, filling the beautiful and the horrific, the growth and the decay of life. It is God, Source, the Infinite.

Look deep enough with your inner eyes and you will see that this Divine Order is in everything.
